NQ17 Mandan NQ17

purely lunar one. Some record was kept of the years, a certain symbol of some distinctive event standing for each year on the record robe, the same system used by the Dakotas. The year was divided as follows:

January	Moon of	seven cold days.
February	" "	the rut of wolves.
March	" "	sore eyes.
April	" "	game; or of the river break-up.
May	" "	sowing; or of flowers.
June	" "	ripe june-berries.
July	" "	ripe choke-cherries.
August	" "	ripe wild plums.
September	" "	ripe corn.
October	" "	the fall of leaves.
November	" "	the freezing rivers.
December	" "	the little cold.

The Mandans were a very liberal and hospitable people, more so than any of their neighbors according to Henry. Food was practically common property in the village. No man could become a chief without much giving of presents, and giving was considered a great honor, the gifts which a man had made being painted on his robe along with his deeds in war. If one expressed a desire for anything it was immediately given to him but a present of equal value was expected in return. In connection with this might be mentioned the custom of taking back a sale; by a return of the purchase price a man might regain anything which he had sold, whenever he wished to.

The hospitality of the Mandans is mentioned by every visitor. Verendrye speaks particularly of his kind reception and says, "Their custom being to feed liberally all who came among them, selling only what was to be taken away."[1] Even their worst enemy when once in their village had nothing to fear and was treated with all kindness. Henry remarked that the Mandans were thieves but never touched any property of a stranger who was a guest in a lodge. They were bound to protect any stranger, even an enemy who might seek refuge in the village.

which were pushed in as they burnt. This was done because the First Man told them they must never have a big fire after the day's cooking was done and showed them how it should be built. It recalls the sacred fire of the Muskogi and other tribes of the lower Mississippi. They declared that many of the every day customs were taught them thus and consequently they always did them a certain way,—thus Ochkih-Hedde taught them to tattoo themselves, and their first chief taught them to kill buffalo and to make shields.

The Mandans practiced penances and sacrifices, especially self-torture which they carried to great extremes. Their medicine or personal guardian spirit was acquired by three or four days fasting and self injury, after which the medicine, often an animal, appeared to the candidate in a dream. This ceremony was also taught to them by Ochkih-Hedde. No expedition or enterprise was undertaken without a liberal sacrifice to some supernatural being, either by offering valuable goods or by physical self-torture. Finger joints were frequently cut off as an offering to the gods and fasting was common as a propitiation. Often a day or more would be spent near one of the medicine scaffolds in groaning, praying and weeping. Lewis and Clarke relate that finger joints were also cut off as a sign of mourning, which Maximilian denies, and Catlin tells how such a sacrifice was a part of the catalogue of tortures in the great Okeepa dance. The custom of consecrating personal property is found here as among the neighboring tribes. A man could make his gun, his horse, his pipe and other similar articles medicine by going through certain ceremonies, most important of which was the giving of a feast. The feast[1] was announced by a public crier, a certain number of guests were invited, the invitations being originally little rods and later playing cards. The drum and rattle made the round of the company. Then the article was consecrated; if a gun, it was rubbed with meal several times, with soup, and lastly with fat, after which the feast took place.

There were many shrines and sacred articles among the Mandans, but judging from the accounts, the sacred bundles or

[1] Maximilian: p. 468.

6: Wied-Neuwied T-5 (1832-1834) 1843 NQ17 Mandan NQ17

The Mandans are hospitable, and often invite their acquaintance to come and see them. Their pipes are made of the red-stone, or of black clay. They obtain the red pipe-heads chiefly from the Sioux; sometimes they have wooden heads lined with stone; the tube is plain, long, round or flat, on the whole, of the same shape as among the Sioux, but they are not so fastidious about ornamenting their pipes as other tribes. They smoke the leaves of the tobacco plant, which is cultivated by them; the bark of the red willow *(Cornus sericea)*, which they obtain from the traders, is sometimes mixed with the tobacco, or the latter with the leaves of the bearberry *(Arbutus uva ursi)*. The tobacco of the Whites, unmixed, is too strong for the Indians, because they draw the smoke into their lungs; hence they do not willingly smoke cigars.

The meals of the Mandans are served in wooden dishes. The spoons are generally large and deep; they are made of the horn of the bighorn (see woodcut, p. 251); sometimes they are yellow, or else they are shallow, made of black buffalo's horn. They have a considerable variety of dishes. The Indians residing in permanent villages have the advantage of the roving hunting tribes, in that they not only hunt, but derive their chief subsistence from their plantations, which afford them a degree of security against distress. It is true these Indians sometimes suffer hunger when the buffalo herds keep at a great distance, and their crops fail; but the distress can never be so great among the Missouri Indians, as in the tribes that live further northwards. The plants which they cultivate are maize, beans, French beans, gourds, sunflowers, and tobacco *(Nicotiana quadrivalvis)*, of which I brought home some seeds, which have flowered in several botanic gardens.

Of maize there are several varieties of colour, to which they give different names. The several varieties are:—1. White maize. 2. Yellow maize. 3. Red maize. 4. Spotted maize. 5. Black maize. 6. Sweet maize. 7. Very hard yellow maize. 8. White, or red-striped maize. 9. Very tender yellow maize.*

The beans are likewise of various sorts—small white beans, black, red, and spotted beans. The gourds are—yellow, black, striped, blue, long, and thick-shelled gourds.

The sunflower is a large helianthus, which seems perfectly to resemble that cultivated in our gardens. It is planted in rows between the maize. There are two or three varieties, with red, and black, and one with smaller seeds. Very nice cakes are made of these seeds. The tobacco

* I brought to Europe specimens of the several kinds of maize grown among the Mandans; these have been sown, but only the early species were ripe in September, 1835. The heads have by no means attained the same size, on the Rhine, as in their native country. There the plant attains a height of five or six feet, and the colours of the grains are very various, bright and beautiful: while, on the Rhine, the plant grew to the height of four or four and a half feet. The later sorts grow to the height of ten feet, and were not quite ripe at the end of October. (See Bradbury, page 145, for an account of the maize of the Mandans.)

According to Tanner (page 180), an Ottawa Indian first introduced the cultivation of maize on the Red River, among the Ojibbeas, or Chippeways.

NQ17 Mandan NQ17

123 156 I had thus far progressed, with high-wrought feelings of pleasure, when the two or three chiefs, who had been seated around the lodge, and whose portraits I had before painted, arose suddenly, and wrapping themselves tightly in their robes, crossed my room with a quick and heavy step, and took an informal leave of my cabin. I was apprehensive of their displeasure, though I continued my work; and in a few moments the interpreter came furiously into my room, addressing me thus:—"My God, Sir! this never will do; you have given great offence to the chiefs—they have made complaint of your conduct to me—they tell me this is a worthless fellow—a man of no account in the nation, and if you paint his picture, you must instantly destroy theirs; you have no alternative, my dear Sir—and the quicker this chap is out of your lodge the better."

The same matter was explained to my sitter by the interpreter, when he picked up his robe, wrapped himself in it, plied his fan nimbly about his face, and walked out of the lodge in silence, but with quite a consequential smile, taking his old position in front of the door for awhile, after which he drew himself quietly off without further exhibition. So highly do Mandan braves and worthies value the honour of being painted; and so little do they value a man, however lavishly Nature may have bestowed her master touches upon him, who has not the pride and noble bearing of a warrior.

000 I spoke in a former Letter of Mah-to-toh-pa (the four bears), the second chief of the nation, and the most popular man of the Mandans—a high-minded and gallant warrior, as well as a polite and polished gentleman. Since I painted his portrait, as I before described, I have received at his hands many marked and signal attentions; some of which I must name to you, as the very relation of them will put you in possession of many little forms and modes of Indian life, that otherwise might not have been noted.

•574 About a week since, this noble fellow stepped into my painting-room about twelve o'clock in the day, in full and splendid dress, and passing his arm through mine, pointed the way, and led me in the most gentlemanly manner, through the village and into his own lodge, where a feast was prepared in a careful manner and waiting our arrival. The lodge in which he [342] dwelt was a room of immense size, some forty or fifty feet in diameter, in a circular form, and about twenty feet high—with a sunken curb of stone in the centre, of five or six feet in diameter and one foot deep, which contained the fire over which the pot was boiling. I was led near the edge of this curb, and seated on a very handsome robe, most ingeniously garnished and painted with hieroglyphics; and he seated himself gracefully on another one at a little distance from me; with the feast prepared in several dishes, resting on a beautiful rush mat, which was placed between us (PLATE 62).

262 264 415 The simple feast which was spread before us consisted of three dishes only, two of which were served in wooden bowls, and the third in an earthen vessel of their own manufacture, somewhat in shape of a bread-tray in our own country. This last contained a quantity of *pem-i-can* and *marrow-*

and the remainder is gathered and dried on the cob, before it has ripened, and packed away in "*caches*" (as the French call them), holes dug in the ground, some six or seven feet deep, the insides of which are somewhat in the form of a jug, and tightly closed at the top. The corn, and even dried meat and pemican, are placed in these *caches*, being packed tight around the sides, with prairie grass, and effectually preserved through the severest winters.

Corn and dried meat are generally laid in in the fall, in sufficient quantities to support them through the winter. These are the principal articles of food during that long and inclement season; and in addition to them, they oftentimes have in store great quantities of dried squashes and dried "*pommes blanches*," a kind of turnip which grows in great abundance in these regions, and of which I have before spoken. These are dried in great quantities, and pounded into a sort of meal, and cooked with the dried meat and corn. Great quantities also of wild fruit of different kinds are dried and laid away in store for the winter season, such as buffalo berries, service berries, strawberries, and wild plums.

The buffalo meat, however, is the great staple and "staff of life" in this country, and seldom (if ever) fails to afford them an abundant and wholesome means of subsistence. There are, from a fair computation, something like 250,000 Indians in these western regions, who live almost exclusively on the flesh of these animals, through every part of the year. During the summer and fall months they use the meat fresh, and cook it in a great variety of ways, by roasting, broiling, boiling, stewing, smoking, &c.; and by boiling the ribs and joints with the marrow in them, make a delicious soup, which is universally used, and in vast quantities. The Mandans, I find, have no regular or stated times for their meals, but generally eat about twice in the twenty-four hours. The pot is always boiling over the fire, and any one who is hungry (either of the household or from any other part of the village) has a right to order it taken off, and to fall to eating as he pleases. Such is an unvarying custom amongst the North American Indians, and I very much doubt, whether the civilized world have in their institutions any system which can properly be called more humane and charitable. Every man, woman, or child in Indian communities is allowed to enter any one's lodge, and even that of the chief of the nation, and eat when they are hungry, provided misfortune or necessity has driven them to it. Even so can the poorest and most worthless drone of the nation; if he is too lazy to hunt or to supply himself, he can walk into any lodge and everyone will share with him as long as there is anything to eat. He, however, who thus begs when he is able to hunt, pays dear for his meat, for he is stigmatized with the disgraceful epithet of a poltroon and a beggar.

The Mandans, like all other tribes, sit at their meals cross-legged, or rather with their ancles crossed in front of them, and both feet drawn close under their bodies; or, which is very often the case also, take their meals in a re-

7: Catlin R, E-5 (1832-1840) 1857
NQ17 Mandan NQ17

159 721 and called loudly for revenge. "Let every Mandan (said he) be silent, and let no one sound the name of Mah-to-toh-pa—let no one ask for him, nor where he has gone, until you hear him sound the war-cry in front of the village, when he will enter it and shew you the blood of Won-ga-tap. The blade of this lance shall drink the heart's blood of Won-ga-tap, or Mah-to-toh-pa mingles his shadow with that of his brother."

With this he sallied forth from the village, and over the plains, with the lance in his hand; his direction was towards the Riccaree village, and all eyes were upon him, though none dared to speak till he disappeared over the distant grassy bluffs. He travelled the distance of two hundred miles entirely alone, with a little parched corn in his pouch, making his marches by night, and laying secreted by days, until he reached the Riccaree village; where (being acquainted with its shapes and its habits, and knowing the position of the wigwam of his doomed enemy) he loitered about in disguise, mingling himself in the obscure throng; and at last, silently and alone, observed through the rents of the wigwam, the last motions and movements of his victim, as he retired to bed with his wife: he saw him light his last pipe and smoke it "to its end"—he saw the last whiff, and saw the last curl of blue smoke that faintly steeped from its bowl—he saw the village awhile in darkness and silence, and the embers that were covered in the middle of the wigwam gone nearly out, and the last flickering light which had been gently playing over them; when he walked softly, but not slyly, into the wigwam and seated himself by the fire, over which was hanging a large pot, with a quantity of cooked meat remaining in it; and by the side of the fire, the pipe and tobacco-pouch which had just been used; and knowing that the twilight of the wigwam was not sufficient to disclose the features of his face to his enemy, he very deliberately turned to the pot and completely satiated the desperate appetite, which he had got in a journey of six or seven days, with little or nothing to eat; and then, as deliberately, charged and lighted the pipe, and sent (no doubt, in every whiff that he drew through its stem) a prayer to the Great Spirit for a moment longer for the consummation of his design. Whilst eating and smoking, the wife of his victim, while laying in bed, several times enquired of her husband, what man it was who was eating in their lodge? to which, he as many times replied, "It's no matter; let him eat, for he is probably hungry."

● [574] Mah-to-toh-pa knew full well that his appearance would cause no other reply than this, from the dignitary of the nation; for, from an invariable custom amongst these Northern Indians, any one who is hungry is allowed to walk into any man's lodge and eat. Whilst smoking his last gentle and tremulous whiffs on the pipe, Mah-to-toh-pa (leaning back, and turning gradually on his side, to get a better view of the position of his enemy, and to see a little more distinctly the shapes of things) stirred the embers with his toes (readers, I had every word of this from his own lips, and every attitude and gesture acted out with his own limbs), until he saw his

10: Neill H-4 (no date) 1884 NQ17 Mandan NQ17

son who Lewis and Clarke found in October, 1804, trading among the Indians. On the 19th Henry and party came in sight of the Missouri. He writes in his Journal: "Descending the high banks we came to the river Bourbeuse [Bourbeux, Moiy.] We had much difficulty in crossing; on both sides nothing but soft clay, into which our horses sunk almost up to their ears. Having got through we washed and cleaned them, and ourselves in the Missouri * * * At 2 o'clock we saddled and proceeded on passing near to the water side. At the foot of the Lodge de Serpent is a bank upon the north side of the Missouri, about three hundred feet high; the side fronting the river is very steep and barren composed of gravel intermixed with a quantity of flat decayed stones of bluish and iron color with some streaks."

A short distance from the foot of the hill was a Gros Ventres winter village,[1] and at 4 o'clock in the afternoon they arrived opposite the mouth of the Knife River, on the bank of which a mile from the Missouri, was also a village of Gros Ventres.[2] Riding down on the north bank of the Missouri, a distance of five miles, to a Mandan village, "we passed," writes Henry, "through one of their old villages that was abandoned a few years ago; they have now built about a mile lower down the river. Near this deserted village we saw great numbers of the dead exposed upon stages about eight feet from the ground. The envelopes or coverings are generally of dressed leathe- and parchments, many of which were still good, whilr others were decayed, and nothing but the bones appeared. e * * We now met a Mandan who was well armed, he ac* companied a party of women that were hoeing corn, and he served as their guard. On perceiving us, he instantly came up and shook hands with us and expressed himself by signs that we should put up at his village. We saw numbers of women and children at work in the corn field.

Just before we entered the village we were met by the chief of the place, Chat Noir * [Black Cat] and a number of the natives. Every one of them were shaking hands with us, and bid us welcome. The chief then conducted us to one of his huts, appropriated for the reception of the strangers. He has another, in which the principal friends of his family resides. He keeps one of his wives, in the one we were in, to attend upon his guests, cook, bring water, etc., and to serve as a bed fellow if required.

In a moment, the whole village flocked around us, and all were curious to see what articles we had brought to trade, and they were neither troublesome, nor impertinent. Having unsaddled our horses, and taken our baggage into the hut, the

* Lewis and Clarke made Poscopeeah or Black Cat, the first chief of the village, and the grand chief of the whole Mandan nation.

1 [See category 116, p. 322, for section, missing here, which is in original account. Ann Y.] 2 [See category 116, p. 323, for missing section. —Ann Y.]

10: Neill H-4(no date) 1884 NQ17 Mandan NQ17

574 609 chief gave our horses in charge of a young man, and told us we need not be uneasy as there would be good care taken of them.

574 262 On going into the hut, we found buffalo hides spread on the ground, before the fire, for us to sit upon, and soon after we were presented with two large dishes of boiled corn and beans, after which they gave us another large dish of boiled dried meat, but very few of us could eat of it, as it had too strong a taste and smell.[1]

231 342 After some other details which we omit, Harvey writes that when night came: "One young man brought in our horses, and put them in the same hut along with us, upon the right hand, on entering, and ourselves upon the left; a space was enclosed with a railing to keep them within bounds. This custom causes their habitations to have a very disagreeable and offensive smell. This precaution of theirs is to keep the horses from being stolen by the Assiniboines, or other enemies, who are frequently lurking about the village.

515 291 "Towards evening, having gone down to the river side, I observed the custom of washing themselves in the Missouri. Both men and women make it a rule, every morning and evening, to go down to the river, and wash for some time; the men make use of the clay to wash their hair, which answers the purpose of soap to take out the white and red earth with which they daub it, after having washed. Modesty in the female sex appears to be a virtue they are unacquainted with. They wear a kind of leather shift which reaches down to the calves of their legs. This they slip off some distance from the shore, and walk very deliberately into the water entirely naked, in the presence of old and young who seem not to pay any attention to them. * * * * * The men make use of no other covering, in the summer season, than these buffalo robes, and even these are seldom worn within doors, and only thrown on when they go out to visit or walk about the village. [352] Both sexes sleep naked. Their beds are raised about two feet from the ground, and hung around with dressed skins. In summer they seldom use any coverings at night, but lay like so many brutes." * * * * * Mr. Henry gives a description of their lascivious dances which is too indelicate to publish. He writes under date of:

252 262 352 512 412 "Sunday, July 20th. At daybreak we were all up, and I took a walk down to the river, where I observed the same ceremony of washing as last evening, with as little reserve as before. Our host on our return presented us with some dried meat, and soon after a dish of corn and beans, but as it is not seasoned with any kind of grease or fat, after the first meal it has a very insipid taste. The corn is generally pounded or bruised in a wooden mortar, which is fixed fast and firm in the ground, in one corner of the hut, and this is the first work performed by the women in the morning.

[1] [Category 116, p. 325.-A] [2] [Category 116, p. 326.-A]

10: Neill H(no date) 1884 NQ17 Mandan NQ17

attentive and polite in conveying our baggage on board. We now perceived another American flag flying in the village on the south side of the river, while that of the Black Cat was still displayed over the hut we had occupied. Our conductor now informed us the flag we saw in the opposite village was his property, and had been hoisted by his orders over his own hut, where he begged we would take up our lodgings. The young men, I observed were very prompt in getting our horses over. They fastened a line to the horse's mouth, the end of which one of them takes in his teeth, and swims on ahead, while others swim along on each side, and in the rear, draws the horse on very expeditiously. They swim remarkably swift, and notwithstanding the Missouri at this place is half a mile wide, and the current very strong, they drift down but a very considerable distance before they land.

Their canoes are of very singular construction and a stranger would scarcely dare venture his life in them to cross such a deep and rapid stream. They are of a circular form; the timbers are nothing but a few bent willows of about three inches in circumference, over which is stretched a raw buffalo hide, with the hair inside, and sewed first to the gunwales which are generally of a willow, about two inches in diameter. I was really surprised to see the great weight that one of those slender vessels would carry. We embarked, baggage, saddles, etc., weighing at least 200 pounds, Mr. Chaboillez and myself, and our ferryman, who was a remarkably stout fellow. Our canoe or dish would have supported at least 100 pounds more. What they make use of, in lieu of a paddle, is a pole about five feet long, split at one end so as to admit of a piece of board, about two feet long, and half a foot broad, which is lashed to the pole and forms a kind of cross, and as there is but one made use of for each canoe, and he that paddles pulls directly for the opposite shore, every stroke he gives turns his dish almost entirely around; when, to preserve his position and place him fronting his intended, route he must give a stroke upon the other hand which brings him up again, and so on until he gets over the river, which, however, is not accomplished until they have drifted down nearly a mile.

Some of them, I observed, were more expert than others in managing their dishes, and did not drift more than a quarter of a mile. But as these vessels are very light they have the precaution to carry them upon their heads, or slung upon their backs to a considerable distance higher up the river, than where they wish to land. When we were on the water our conductor repeatedly made signs to us to salute the flag, by firing our guns, but we did not think proper to comply with his wishes or pretended we did not comprehend him.

We soon after landed at the village, which is situated upon the very edge of the bank. Here we were received by another

10: Neill H4(no date) 1884 NQ17 Mandan NQ17

chief called Le Grand * who insisted upon our taking lodgings in his hut, which stood near the edge of the banks. We accordingly entered it, but soon after we were visited by several other principal men, who requested some of us to take up our abode in their huts during our stay among them. La France advised us to do so, telling us we would be more at our ease by separating than if we remained all in the same hut. Accordingly Mr. Chaboillez and his people, consisting of an Indian who was his brother-in-law, and Mr. Allen McDonnell, took up their lodgings with Hairy Horn, and our guide, Hugh McReacan, (Cracken) Straight Horn, myself and my people, T. Viandrie and Joseph Du Charme, remained with Le Grand, a very civil fellow. This arrangement having been settled and instantly put into execution, we were provided with beds, or buffalo hides to sit upon. * * * * * * We paid a visit to Le Gros Blanc, who thought we had somewhat slighted him in not taking up our residence in his hut, but kept the flag flying in honor of our arrival until sunset. We made amends as far as our circumstances would permit, and presented him with some tobacco, ammunition, etc., as a remuneration for his trouble in assisting us over. He was perfectly satisfied, and appeared highly pleased with the presents.

We found in this village a Canadian by the name of Jussaume,† who accompanied Captains Lewis and Clarke to Washington on their return from their voyage of discoveries to the Pacific Ocean as interpreter to the Mandan chief, Le Gros Blanc. This man has been a resident among the Indians for upwards of fifteen years. He speaks their language tolerably well, has a wife and family who live and dress in the same manner as the natives. As for himself, he still retains the outward appearance of a Christian, and his principles as far as I could observe, are much worse than those of a Mandane. He is possessed of every superstition natural to these people, nor is he different in performing every mean, dirty trick which they have acquired from their intercourse with a set of worthless scoundrels accustomed to visit these parts, some for the purpose of trade, and others, to save themselves from justice and the laws of their country, that would not fail to punish them for their numerous offenses."

EDWARD D. NEILL.

[TO BE CONTINUED.]

*Le Gros Blanc, or Big White, called by the Indians Shahaka was the first chief of this village and was recognized by Lewis and Clark and presented with a medal. Ohheenaw, Le Grant, or Big Man was much esteemed in the tribe. He was a Cheyenne taken prisoner, and then adopted by the Mandans.

†In the narrative of Lewis and Clarke his name is spelled Jesseaume, and on the 27th of October, 1805, was engaged as interpreter, and with the expedition went to the Pacific Ocean, accompanied by his Indian wife and babe. On the 16th of August, 1806, soon after Henry's departure, Lewis and Clarke returned to the Mandan village, and Le Gros Black, Big White, with his wife and son and Jessaume, the next day accompanied the military expedition to St. Louis, and from thence they went to Washington and were presented to President Jefferson.

[Category 116, p. 332.-A.]

Sections from Henry's Journal Not Printed in Neill's Version (page numbers refer to those in the Coues edition of Henry's Journal (1897):

224 [322] We had now a well-beaten path, but were several times in danger of breaking our necks in deep pits which the natives had dug in the path to catch wolves and foxes in winter. Some of them are 10 feet deep, hollowed out to a space about 30 feet in circumference, whilst the entrance is no wider than the foot-path and about five feet in length. Those holes are covered with dry grass at the season when wolves are good, and every morning are found to contain some of those animals. In summer the grass grows strong and high about the mouths, entirely concealing them, until one arrives upon the very brink and is in danger of tumbling in headlong.

491 241 [323] Before we reached the (Mandan) village, we passed through a wood about two miles long. The road was bad, deep with mud and mire, the river having overflowed there lately. Having got through this wood, we came to several plantations of corn, beans, squashes, and sunflowers—the latter, indeed, grow in every direction, without cultivation, at some distance from the fields, where the seed has been carried by the wind; but such are never gathered by the natives, as they are not so good as those that have been properly sown and taken care of.

262 574 [325] This was just to their own palate, as they seldom eat meat until it begins to smell. We were invited into several huts successively and presented with dried meat in a state of corruption, corn and beans, together with parched corn and fresh ears pounded up in a wooden mortar; this last dish we found good.

439 177 They soon asked us to trade, and brought buffalo robes, corn, beans, dried squashes, etc.; but we informed them that we did not come here for that purpose, merely to visit them and see the country. They could not comprehend why we should have come so far out of mere curiosity, and said that all white people who came there did so with a view to trade. They suspected that we had goods which we wished to take over the river to the other villages, and were anxious to prevent it. They plagued us until dark, when they retired disappointed.

[p. 384 (A)]

832 repair to the cornfields and are soon followed by the young men,
834 who enjoy their company and take every liberty. The young
men then return, and, if no hunting party offers, pass the day on
461 the tops of the huts, sleeping in the sun, or strolling from hut to
526 hut, eating corn and smoking Missourie tobacco. At other times
they amuse themselves by running races either on foot or horseback,
and performing warlike manoeuvres; they have also a favorite
game which occupies much of their time.

512 [328] ... this is the first work performed by the women in the
515 morning after having paid their devoirs to their lovers and washed
themselves in the Missourie. ... every family being provided
415 with a brass or copper kettle for the purpose of cooking flesh.
177 Whether this proceeds from superstition or not I cannot pretend to
771 say, but they assured me that any kind of flesh cooked in those
574 earthen pots would cause them to split. One or more of the largest
kind is constantly boiling prepared corn and beans, and all who come
in are welcome to help themselves to as much as they can eat of the
contents.

231 .....Early this morning our young hostler took our horses to feed
437 in the meadow but never allowed them to be for a moment out of
648 his sight, lest the Assiniboines or other enemies might steal them.
We purchased sweet corn, beans, meal, and various other trifles,
for which we paid in ammunition, beads, and tobacco.

439 [329] It would have been in vain for us to attempt to prevail
upon anyone in this village to ferry us over; for, as long as a stranger
has any property, they wish him to trade all he brings in the first
village he enters, every village being ambitious of getting as many
439 European articles as they can, [330] particularly arms and ammuni-
609 tion. This is good policy; for, notwithstanding they are so near each
other, and live in amity, they are not free from jealousy, and have
578 often had serious misunderstandings, sometimes ending in the death
569 of an individual, and nearly occasioning civil war. They have also
to guard against their natural enemies, the Sioux, who are at no great
distance. The Pawnees, also, with whom the Mandanes formerly
lived in the same villages, are now their most inveterate enemies.
Arms and ammunition are, therefore, necessary articles, and every-
one has a stock of ball and powder laid up in case of emergency.

675 We packed up our purchases, and gave them into the care of the
673 landlord. These people are much given to thieving, but in the hut
[577] in which a stranger is lodged, his property may be left in perfect
security; none dare touch it, as the master conceives his honor
concerned in whatever is placed under his immediate protection.
Out of doors, if they can pick your pocket, or pilfer any article,

675 it is gone in an instant, and search would be in vain; everyone
673 would wish to appear innocent, although they are not offended when accused of stealing, but laugh the matter away. .....We paid
437 our landlord for board and lodging, as well as the care of our horses,
177 and of the articles left under his charge, as we never expect the least favor from any of these fellows without recompensing them accordingly. He appeared very well pleased with the following articles, which we gave him: 60 rounds of ammunition, 4 large knives, 2 awls, 1 fathom of tobacco, 1 steel, 5 flints, 1 dozen hawk-bills, 2 worms (wormers for guns), and 1 dozen brass rings....

609 [332] My host was so obliging as to give up to me one of his
● 574 own best beds, well surrounded with dressed leather. We had a plentiful supply of corn and beans, and were soon invited to several huts, where we [333] were treated with a very palatable dish of
[421] pounded peas and parched corn; but it is customary for invited guests, on leaving, to present the master of the hut with a few inches of tobacco, for which he always appears very thankful.

728 [335] About 30 Big Bellies soon arrived on horseback, at full speed; they brought an interpreter with them. This party consisted of some of the principal war chiefs, and other great men, who did not appear well pleased, but looked on the Pawnees with disdain.

285 [339] ...seated on a mat made of small willows of equal size, fastened together [340] by threads of their own manufacture, passed through each stick about a foot apart.

342 [340] Seldom more than one family occupies the same hut.

437 [342] We paid the young men for taking our horses across the
177 river, and the women for assisting us with the canoes. The total cost was: 1 fathom of tobacco, 4 knives, 6 flints, 6 awls, 6 worms [gun wormers—analyst], and 10 balls. I also paid my landlord for the time we might remain here, which I supposed would be about ten days for three persons, including board and lodging, stabling for our horses, and care of our property. They make no price, leaving that to the generosity of guests, and should the payment be too little they still appear to accept with gratitude; but the visitor is afterward left to take care of his own property and horses in the best manner he can. It is impossible to get the most trifling service from the natives without immediate payment; not even an inch of cord will they part with without receiving something in return. It is true a trifle will please them, and they are

[P. 384(D)]

304 They have another custom of putting their courage and con-
785 tempt of pain to task by tormenting their flesh in a most atrocious manner. This is done by pinching up a fold of the skin and flesh an inch broad, under which they pass the iron barb of an arrow; they raise stripes in this manner from the back of the hand to the shoulder, and thence to the breast, there joining three or four separate circles of incisions made in the same manner on the lower part of the breast. Some content themselves by raising stripes of different lengths upon their arms and thighs, and forming crescentic cuts on the breast in a very regular manner, one within the other; some with the horns upward, others downward, according to fancy.

304 Most of the women have their faces tattooed in a very savage manner, lines a quarter inch broad passing from the nose to the ear, and down each side of the mouth and chin to the throat. This disfigures them very much; otherwise, some would have tolerably
304 good faces. Some tattooing is done to beautify the face, but at
684 other times it is the disfiguring mark of a fit of jealousy in the husband. [366] When a Mandane's handsome young wife is too lavish of her favors without his consent, he tattoes her face as a punish-
[576] ment. Although it cannot be said that these people are much given
837 to jealousy, still it is absolutely necessary for a woman to have the consent of her husband to cohabit with a stranger, whether he is white or one of their own people. But I observed during my stay that this consent is not so very necessary in regard to the inhabitants of the same village, as every morning early there were examples to be seen in their plantations of their loose way of living. Many
[164] of our servants who frequent these parts to trade in the winter, and who have too intimate connections with the fair sex, are attacked by a painful and loathsome disorder, which commonly appears in the groin, where it forms abscesses and, if neglected, will soon prove dangerous.

574 [401] At three o'clock we were all safely lodged in Black Cat's
609 hut, whom we found as usual very civil and complaisant, although he plainly saw we had nothing to pay him for his trouble. This man is one of the best Indians we met on the Missourie. We found
[432] what articles we had left in his charge all in good order, and carefully hung up to keep them from the mice. He even gave me his best horse upon credit; payment to be sent this fall by any opportunity. This was considered an extraordinary circumstance for a Mandane. He gave us several instances of his good nature and generosity while we were packing; every assistance in his power he gave us, without

574 609 277 any expectation of payment. Being almost destitute of tobacco for our journey, he gave us some of their own manufacture. As that herb is not yet arrived at maturity, they use only the blossoms [402] at present. These are collected as required, dried before the fire on a fragment of an earthen pot, and smoked by all the natives. But I find the flowers a very poor substitute for our own tobacco—a nauseous, insipid weed. The ripe leaf is somewhat better, but even that is mere trash, possessed of neither strength nor virtue.

648 [491] [137] [403] We soon after took the road, bidding a final adieu to the Mandanes. The road through the wood was very muddy and bad. We found amazing quantities of poires, perfectly ripe. The natives here are so surrounded by their different enemies at all seasons, and particularly when the fruit is ripe, that the women dare not leave the villages to gather it, though there is a great plenty of chokecherries, cerises, etc. Even when they go out to hoe their corn, young men, well armed, keep on the rounds at short distances from the women to prevent surprise from an enemy. This is a necessary precaution, as they have frequently been attacked while working in the fields. The village on the N. side lies under a double disadvantage, surrounded by thick woods for nearly two miles upon the land side, and having close by a vast quantity of young sprouts and brushwood, enabling an enemy to approach very near without being discovered. A single Sioux has been known to secrete himself for several days among those bushes until a favorable opportunity has offered, when he has dispatched a Mandane, and got away with the scalp.
